[Only one dead channel out of *14,336+256+362*]

Booster Neutrino Beamline

- BNB beam permit granted on Oct 13.
- Successful test of horn at nominal voltage/current.
- Beam established in BNB last weekend.

- BNB is up and running
 - Problems with BPMs and AutoTune and being fixed.
 - The beam $\sim 2E15$ p/hr and appears relatively stable.
- Continuing with startup.
