

# SciBooNE report

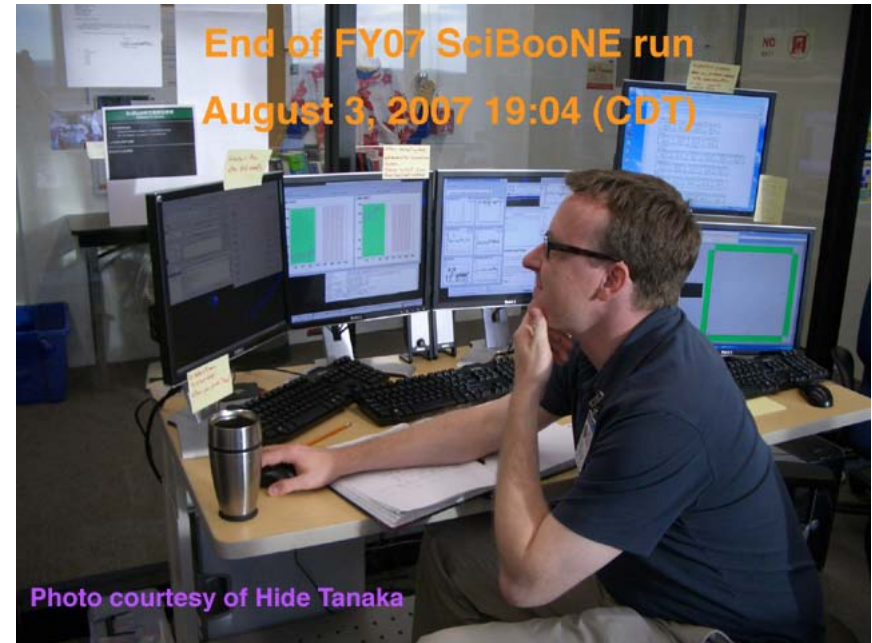

Masashi Yokoyama (Kyoto)  
for SciBooNE collaboration

09/10/2007

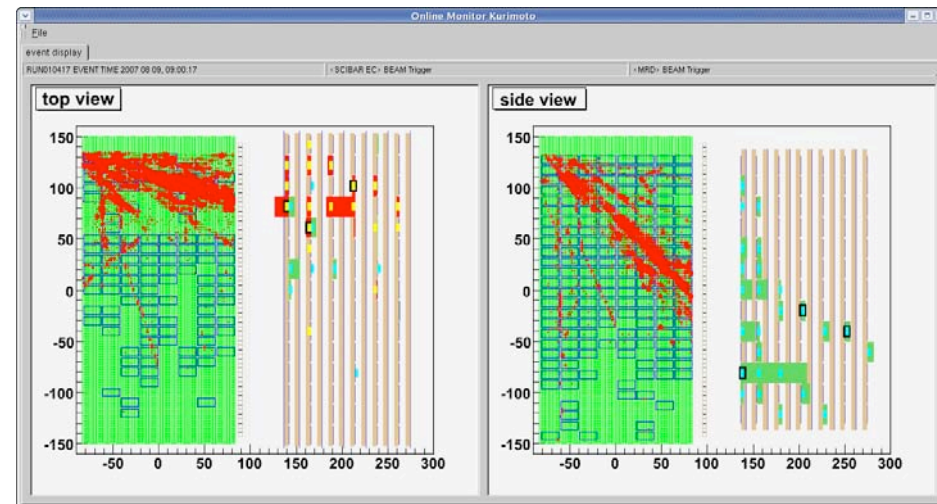

All Experimenters Meeting

# SciBooNE status

- Beam run finished on Aug. 3
- Special cosmic run for calibration: Aug. 6-9
- Electronics turned off on Aug. 9
- Replaced/fixed bad MRD counters
- Planned during shutdown:
  - SciBar FEB replacement
  - MRD base modification

Co-spokesperson stopping the last run

Last cosmic event before turn-off

# Booster Neutrino Beamline

- Reverse Horn Polarity
  - Take wipes.
  - Reverse polarity of horn power supply.
  - Test horn.
- ✓ Retrieve Corrosion Tabs from 25m Absorber (27/28Aug07)
  - No obvious corrosion to stainless steel.
  - Also inspected spare lifting lug – no apparent damage.
- Change RAW DI Bottle (50%)
- ✓ Dry out horn (09Aug07)
- Check Leakage Current on Ion Pumps
- Power Supply Maintenance
- Toroid Work
